

Quick-Attach Arrangement for Thigh Rig

Abstract of the Disclosure

A thigh rig includes a carrier and a quick-attach arrangement. The carrier includes a pad body, having a front side and a rear side, for detachably attaching on a user's body and a pouch panel overlappedly provided on the front side of the pad body to
5 define a storage compartment, for receiving a pistol-like weapon therein, between the pad body and the pouch panel. The storage compartment has a top opening having a holding portion formed by a top edge of the pouch panel. The quick-attach arrangement includes a pair of reinforcing elements spacedly provided at the top opening of the storage
10 compartment for selectively adjusting a width of the holding portion of the top opening, so as to securely hold a wrist of the weapon in the storage compartment in position.
